

The Enlighten Designs company has had a new layout designed for their website. The assignment is to develop this website from the design.

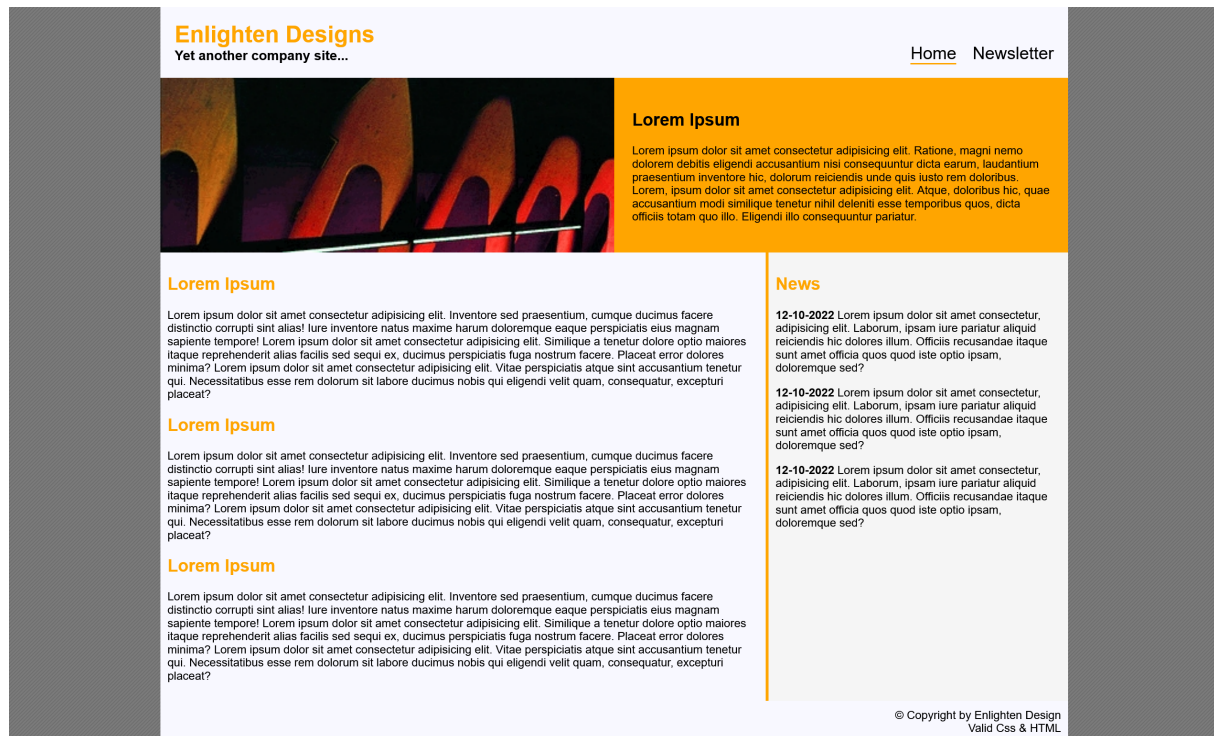

Figure 1 Home

All the required texts and images to develop this website are in the zip file. The value of the orange colour is # FFA500.

The website code must satisfy a number of requirements:

- HTML 5
- A separate (CSS) style sheet
- Grid and flexbox layout

The page makes use of 2 links:

- Link to the homepage (so index.html)
- Link to the subscription page for the newsletter

Furthermore, use must be made of the following font-family:

- Arial, Helvetica, Verdana, Sans-serif (font size 1em)

The background of the page is an image as a repeating pattern (bg.gif)

If the mouse is moved over one of the menu items, then this must be underlined in orange (see figure 1, **Home**).

Figure 2 Extra details

Assignment 1

Develop the home page of this website as shown in the image above. All the above mentioned elements must work or be implemented.

If there are elements with no special specification, make it so it looks like figure 1. Do use the learned techniques.

Assignment 2

Website visitors must also be able to subscribe to the Enlighten Designs newsletter.

Enlighten Designs want to receive the following information from the website visitors via the mail.

(So submit a mail).

First name

Last name

Address details

Email address

Develop a newsletter page for Enlighten Designs where the content area is replaced by a form.
